

**Job Title: JUNIOR AUTOMOTIVE ENGINEER**

**Location: COVENTRY/UK**

**Job Description:**

We are currently recruiting for the position of a Junior Automotive Engineer to join our Coventry team. We are not looking for any particular skills but rather potential, motivation and a strong interest in one of the following fields: Vehicle Diagnostics, Test Automation, Vehicle Networks, Vision Systems, Self Driving Car, Simulation. The successful candidate should be prepared to work hard and anticipate a stiff learning curve from the very start. Employment in the UK may be preceded by a trial period in our Gdansk office. Driving license and good English speaking skills are required for this role.

**Typical Tasks:**

- Supporting flashing activities (software download to automotive component)
- Coordination stuff and equipment
- Collecting and delivering batches of parts to various manufacturing plants
- Visiting clients sites to support engineering activities
- Creating and running test automation scripts tests
- Preparing harness and connectors
- Developing interfaces for Data Loggers and automotive components (Hardware Design)

**Candidates Profile:**

- University Degree in Informatics, Telecommunication or Electronics or similar (last year students and graduates will be considered)
- strong interest in self-learning and motivation is absolutely essential
- strong interest in automotive industry is absolutely essential
- some experience or interest in Simulation and Testing would be beneficial
- some experience in Test Automation or Vision Systems would be beneficial
- some experience or interest in Vehicle Networks and Diagnostics would be beneficial
- interest in Self Driving Car would be beneficial
- commitment to work and flexibility
- fluent English
- driving license is required (needs to be obtained before moving to the UK)

**Interested?**
